MHP
Sterile Instrumente

Introduction

Surgical sets are indispensable components of modern healthcare and provide healthcare professionals with a carefully selected combination of instruments tailored to specific procedures and clinical requirements.

MHP – Sterile Instruments offers a comprehensive range of high-quality surgical sets, specifically designed to meet the requirements of modern operating theatres, outpatient surgery centres and clinical environments. Our portfolio includes procedure-specific and discipline-specific sets containing carefully selected instruments that support precise surgical workflows and optimised preparation processes.

All instruments included in our surgical sets are manufactured to strict quality standards and selected to ensure functionality, reliability and ease of use. By combining essential instruments into structured sets, we help to simplify preparation, improve the efficiency of workflows and ensure high standards of patient care

.

With this catalogue, we offer you a comprehensive overview of our surgical set solutions – featuring reliable combinations of instruments for a wide range of surgical specialities and clinical applications in everyday medical practice.

Enucleation Surgery Set

Evisceration:
The contents of the eye are removed, but the outer layer of the eyeball (sclera) is left intact.

Enucleation:
The entire eye, including the globe, is removed but the orbital contents are left in place.

Exenteration:
The contents of the eye socket are removed, including the muscles, lacrimal gland, optic nerve and various bones of the orbit.
